About Sierra Rutile

Sierra Rutile is one of the world’s largest natural rutile producers, with an established operating history of more than 50 years from its operations in Sierra Leone.

The Company is well positioned to extend its operations through the proposed development of the nearby Sembehun deposits. Sembehun represents one of the largest and highest grade natural rutile resources in the world, and its development would extend Sierra Rutile’s mine life by at least 13 years.

Sierra Rutile is listed on the Australian Securities Exchange. Further details about Sierra Rutile are available at www.sierra-rutile.com
